

## MAINTENANCE GUIDELINES

### 1. CLEANING

- You can thoroughly clean the panels using a soft, non-abrasive cleaning agent. However, you usually only need a damp cloth to clean the panels.
- Do not use abrasives, aggressive substances or chloride-based cleaning products. Solvents should also not be used.

### 2. PROTECTING

- Use appropriate window coverings, such as drapes, window-treatments or UV-tinting on windows, to protect the product from direct sunlight as long-term exposure to direct sunlight can potentially lead to discoloration.
